Legalism on A Housing Plan

By Shomit Sirohi

I argue that there is a housing plan in Vasant Vihar D-Block near a niche market place and in Embassy related area which then is meant to be the following architectural plan –

Market_____Houses(Independent)_____

Which then is also and in fact Interpreted as glass buildings which reflect ordinary houses which means in fact a office region.

Make this now legal perception –

Visible people are converted to Embassy related people and bouncers I witnessed there are disappearing and actually in a case – which then is the evenings there because (cause) police action by IPS which has effect (their presence)

Now it is actually legal action on this crowd we have to witness.

Now the housing plan is finally also described as –

Left side Market, lane and housing plan which is about the index of parallelism – imagine this to be the legal action –

It appears as housing glass buildings and ordinary housing which reflects – now we will theorise in Fredric Jameson.
